Trailze

Carleen Petrosian

Project Description

Live Navigation
Access the application on the trails or campground you are visiting, to prevent making wrong turns, getting lost, etc. Trail and campground information will be pulled from TrailAPI.

Social Network Integration
Allow users to report incidents encountered such as: closed or run-down trails, bear or rattlesnake spotting, etc. It can also be used as an identification map, allowing the spotting of rare birds, other animals, plants, etc. to be shared with those who show interest in these activities.

User's Point of View

Project Justification

Why I am interested:
- Utilize skills and knowledge acquired
- Create a phone application for the first time

Good use of my abilities:
- Frontend, Backend
- Design and Implementation
- Planning, Teamwork, Communication

Thank you!
